Dear Sir/Madam,

Change of Standard

Product : HOT ROLLED CARBON STEEL STRIP AND SHEET OF COMMERCIAL AND DRAWING QUALITIES

New Standard : MS 1705 : 2023

Old Standard : MS 1705 : 2003

The above matter refers.

Please be informed that MS 1705 : 2003 which is currently in use for certification has been replaced with MS 1705 : 2023.

The changes featured in the new standard are:

- a) Expansion of the scope to include "plate";
- b) Incorporation of "SPHF - deep drawing aluminium killed".
- c) Updating of reference documents and example.
- d) Incorporation of new subclauses on "Mechanical properties", "Descaling", "Edges", "Skin pass", "Tensile test" and "Bend test"; -
- e) Rephrase subclause "Oiling" and its requirement.
- f) Incorporation of mill edge tolerance for steel plate and sheet in Table 6;
- g) The word "cut edge" tolerance has been changed to "sheared edge" and word "heat analysis" to "ladle analysis";
- h) Incorporation of "Method 2" for measurement of out-of-squareness for cut length of hot rolled steel sheet. and plate in Table 11 and Figure 4

As such, the following is the proposed plan and conditions to be undertaken by licencees before the product can be granted certification to the new standard.

- All licencees are given 24 month(s) grace period effective from the date of the Certification Panel's approval to change certification to the new standard.

In line with our procedure, licencees / related parties are requested to provide feedback / comment over the proposed plan. If no reply is received within 1 month from the date of this letter, we shall assume that you agree to the proposed plan.
